I am a JavaScript developer focused on creating beautiful, fast, and flexible web applications. My current development stack of choice consists of Angular, Node, and MongoDB. I love how these technologies can work elegantly together to create awesome applications.

Development Projects
All of the websites displayed below were created by yours truly:

Redside Property Management – http://redside.herokuapp.com (under construction – click 'Search')
- Angular, Node, Mongo, Grunt
- Responsive Design
- Rich Google maps feature with custom overlay
- Database designed to handle specific queries (# of rooms, bathrooms, washer/dryer, etc.)

TradePro – http://tradepro.herokuapp.com
- Backbone, Node, Mongo, KineticJS, PassportJS, Grunt
- Replicates circuitry found in HVAC equipment
- Interactive Volt Meter, Thermostat, and Breaker
- Custom skill reports broken down by electrical component

PM Project – (no website available)
- Backbone, Node, Mongo, Grunt
- Customer management application for HVAC industry
- Database manages customer information, customer equipment, and service history
- Data is interpreted to provide system health information

Alpine Aire – www.alpineaire.net
- PHP, Javascript, HTML/CSS
- SEO (moved Alpine Aire to top of page 1 in Wenatchee, Wa)
- Managed Facebook and Google AdWords campaigns
- Separate mobile website available

Education
Code Fellows JavaScript (2013) – A rigorous 2 month JavaScript course for qualified applicants (full-time)

University of Washington (2011) – Graduated from the Seattle campus with a degree in English. During my time there I had a job building, repairing, and wiping personal computers.

Employment History
Priveazy (2011 – 2012)
- A start-up website founded by a former Microsoft employee
- HTML / CSS, JavaScript, PHP, Adobe Creative Suite, Content Development
- Worked closely with founder to define user experience
- Designed mockups to suggest site improvements
- Created project deadlines with founder to monitor performance
- Animated videos (and narration) using Adobe Suite

HVAC Service Technician
- This job has taught me more about hard work than could be put into words. I have done this job on and off over the past 4 years.
